

Wireless Access to PSD-WiFi

PSD-WiFi is Parkland School Division's secure (*encrypted*) wireless network allowing Internet access between 6:00 am and 10:00 pm to any wifi capable device.

To connect to **PSD-WiFi**:

1. Select **PSD-WiFi** from the list of wireless network choices on your device
2. Enter the *passphrase* **PSD-WiFi** to join your device to the network
3. You can now browse the Internet

Connection to the **PSD-WiFi** network *may* close if;

- The device goes to sleep,
- The browser window is closed,
- The Internet is not actively used or
- The device is no longer in range of the PSD-WiFi network.

In all cases your device should "see" the **PSD-WiFi** network and automatically reconnect without any user intervention.

NOTE:

Use of any Parkland School Division network, wired or wireless, is subject to Administrative Procedure 140 - Computer Network Acceptable Use.
